I have a bunch of old DVDs, and I can't wait to give this utility a test run.Q: Highcharts for Android - changing chart icons Hi I'm playing around with charting on Android in the hope of being able to display graphs like I'm used to seeing on iOS. I'm currently using highcharts to try and get something to show, but there isn't the same amount of icons like the iOS highcharts. Do I have to use highcharts to get these same icons, or is there a way to get the same icons using the default assets highcharts and the grid layout? Thanks. A: You can use the Android library. I've made some little changes to the library to make the default icons a bit more meaningful. Check them out here Note that many elements of the original were not provided, especially the negative values. You need to use "addLine" like the example and you cannot change the colors of this from the author. You can see a sample app I created that uses these icons here:
